SUMMARY OF QUALIFICATIONS:

Software Developer with experience in Java and a strong background in Restful API development. Skilled in applying clean code principles and design patterns, as well as documenting projects using Swagger. Experienced in RPA and automation with technologies such as Selenium and Robot. Proficient in SQL Server, Oracle, and MySQL databases, as well as Agile methodologies, particularly Scrum. Capable of analyzing requirements and estimating project hours, as well as implementing improvements in existing systems. Previous experience in technical support, infrastructure maintenance, and internal software development.

EDUCATION:

- **Bachelor's Degree in Computer Science**
 - Anhanguera Educacional | January 2018 – December 2021

PROFESSIONAL EXPERIENCE:

- **Java Software Developer – Yank! Solutions | September 2022 – Present**
 - Development of Restful APIs using Java, Spring Framework, and JPA. Applied clean code principles and design patterns, along with creating documentation using Swagger.
 - RPA development using Java, Spring Boot, Selenium, Sikuli, UI Automation, and Robot.
 - Project monitoring and database queries using SQL Server, Oracle, and MySQL.
 - Experience with Agile Scrum methodology, requirement analysis, and hour estimation for future projects.
 - Implementation of improvements in existing projects.
- **IT Analyst – Dolomia | January 2022 – September 2022**
 - Installation of cables and other infrastructure components.
 - Development of internal software.
 - Project documentation.
- **IT Intern – Dolomia | October 2020 – December 2021**
 - Configuration and monitoring of user environments, including cameras, computers, notebooks, printers, and peripherals.
 - Preventive maintenance of Linux and Windows servers.

PROJECTS:

- **FitTrack – Mobile App Development | September 2024 – Present**
 - Mobile application focused on workout tracking and load progression, developed in React Native (iOS/Android) with a Java backend.
 - Features include exercise logging, performance history, personalized goals, and cloud data synchronization.
 - Development of RESTful APIs for integration between the mobile frontend and backend.
 - Database management for storing user information and workout progress.

SKILLS:

Programming Languages: Java, Python, JavaScript, ShellScript

Frameworks: Spring Boot, JPA, Hibernate, React, React Native

Databases: MySQL, PostgreSQL

DevOps & Infrastructure: Linux, Docker

LANGUAGES:

Portuguese (Native), English (B2), Georgian (A1)

VOLUNTEER WORK:

- **Tutor – Microcamp | September 2017 – February 2018**
 - Tutoring students and assisting teachers in the classroom. Maintenance of equipment. On Fridays, conducted extra classes for students who missed lessons or needed reinforcement in specific tasks.
